

DEVANSH BHANDARI

Computer Science Student — Full-Stack Web Development

Himachal Pradesh, India | 7986067089 | bhandaridevansh085@gmail.com | github.com/bhandaridevansh085-oss | linkedin.com/in/devansh-bhandari-a17939395

PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA: 8.8) with a strong foundation in C programming, Data Structures and Algorithms, and Operating System concepts (processes, memory management, file systems). Comfortable working in Linux/Unix environments with Git version control, and experienced in building full-stack applications using React, Node.js, Express.js, MongoDB, and Java. A keen learner with strong problem-solving ability and teamwork skills, eager to contribute as a Software Engineering Intern.

EDUCATION

Bachelor of Engineering in Computer Science & Engineering

Chitkara University | 2024 – 2028

CGPA: 8.8 (through 4th Semester)

Class XII (Senior Secondary)

G.M.T International School | 2023 – 2024

TECHNICAL SKILLS

Languages: C, C++, Java, Python

Systems & Tools: Operating Systems (Processes, Threads, Memory Management, File Systems), Linux/Unix, Git

Frontend: React, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, MongoDB

Core Concepts: Data Structures & Algorithms, OOP, REST APIs

PROJECTS / EXPERIENCE

Movie Catalog & AI Recommendation System (Almost Completed)

Full-stack web application | React, Tailwind CSS, Node.js, Express.js, MongoDB, Java

- Built a full-stack movie catalog platform enabling users to browse, search, and filter movies by genre, rating, and release year.
- Implemented an AI-powered recommendation engine that suggests movies to users based on viewing preferences and behavior patterns.
- Designed RESTful APIs with Node.js and Express.js to handle catalog data, user preferences, and recommendation logic.
- Developed a responsive, user-friendly interface in React, with backend business logic in Java, focused on recommendation accuracy and performance.

StudyNotion – Peer-to-Peer Study Platform (Completed, Group Project)

Full-stack MERN web application | React, Tailwind CSS, Node.js, Express.js, MongoDB

- Collaborated in a team to design and build a peer-to-peer study platform connecting senior students with juniors for mentorship and academic support.
- Implemented a system enabling seniors to offer tutoring sessions in exchange for experience or paid compensation.
- Built a responsive frontend using React, Vite, and Tailwind CSS, with a RESTful Node.js/Express.js backend and MongoDB, using Git for team collaboration.

ACHIEVEMENTS & CERTIFICATIONS

- Completed a comprehensive MERN Stack Development certification course, covering full-stack application design and deployment.
- Earned certifications from Infosys Springboard in Full-Stack Web Development and foundational Computer Science concepts.
- Fundamentals of Linux — Certification (January 23, 2025).
- Elements of AI — University of Helsinki (November 4, 2024).

SOFT SKILLS

Keen Learner | Team Collaboration | Problem-Solving | Time Management | Adaptability
